DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-112, drawn to cobalamine compounds, classified in class 514, subclass 52.
 - II. Claims 113 and 114, drawn to the use of a cobalamine compound for the manufacture of a medicament for imaging, classified in class 514, subclass 52.
 - III. Claims 115 and 116, drawn to the use of a cobalamine compound for the manufacture of a medicament for treating a tumor, classified in class 514, subclass 52.
 - IV. Claims 117 and 118, drawn to a method of treating a tumor, classified in class 424, subclass 9.2.
 - V. Claims 119 and 120, drawn to a method of imaging a tumor, classified in class 424, subclass 9.2.

The inventions are distinct, each from the other because of the following reasons:

2. Invention I is related to Inventions II-V as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product can

Art Unit: 1619

be used in a variety of materially different processes, such as the manufacture of a medicament for imaging, the manufacture of a medicament for treating tumors, for a method of treating a tumor, or for a method of imaging a tumor.

3. Inventions II-IV are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. For instance, a process of manufacture of a medicament for imaging a tumor has a different mode of operation from a method of manufacture of a medicament for treating a tumor, and both manufacturing methods are different from methods of imaging a tumor or methods of treating a tumor.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Claims 1-120 are generic to a plurality of disclosed patentably distinct species comprising derivatives of formula I. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. By single species is meant a single compound. The compound may be named in any of four ways: 1) according to IUPAC standard, 2) by a pictorial representation of the compound, 3) by setting forth the specific chemical group that each variable of the Markush group

Art Unit: 1619

represents, or 4) by naming a claim or an example which itself sets forth a single compound.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

In the event that the Markush-type claims are not found to be allowable, the examination of the claims presented will be limited to the extent that they read on the elected species and claims directed solely to the elected species. The claims directed solely to the non-elected species will be held withdrawn from consideration.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined and an election of species even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
